

ALEX-R5 series

Ultra-small LTE-M / NB-IoT SiP with Secure Cloud

Miniature form factor with integrated u-blox UBX-R5 and UBX-M8 chipsets

- Super low power, accurate, and reliable positioning with u-blox M8 GNSS receiver
- Concurrent accurate positioning and LTE signalling, as needed by tracking applications
- Cost-effective, power efficient, end-to-end IoT communication with MQTT Anywhere
- IoT-Security-as-a-Service protects your business-critical data from device to cloud
- Designed to last an IoT lifetime and 5G-ready

Product description

The very small ALEX-R510M8S delivers LTE-M and NB-IoT connectivity with GNSS positioning. It combines the secure u-blox UBX-R5 IoT chipset and the u-blox UBX-M8230 GNSS chipset with the highest level of integration in a System-in-Package (SiP). Measuring just 14 x 14 x 1.5 mm, ALEX-R510M8S occupies less than 50% of SARA-R5's PCB without affecting the overall LTE and positioning performance. It is ideal for size-constrained devices like people and animal wearables, small asset trackers, portable healthcare systems and other small IoT applications. The GNSS receiver Super-E mode provides ALEX-R510M8S with an ideal balance between low power and good performance. It is optimized for power-sensitive and battery-powered applications, featuring a market-leading sub- μ A current consumption in PSM mode.

ALEX-R510M8S offers a dedicated GNSS serial interface and a dedicated GNSS antenna interface, which provides highly reliable and accurate positioning data concurrent with LTE communication. The module works seamlessly with u-blox location services: AssistNow A-GNSS, CellLocate mobile network-based location, and CloudLocate positioning in cloud service. u-blox Secure Cloud functionality, which supports IoT-Security-as-a-Service, makes ALEX-R510M8S the ideal choice for devices that transmit critical and confidential information.

With all in-house technology and full hardware and software ownership, u-blox can guarantee long-term device availability and provide lifetime support of the entire platform, down to the chipset level. u-blox R5 series modules are the only products in the market with a real LTE and GNSS chip-down integration, supporting the standard LTE-M and NB-IoT Power Class 3 of 23 dBm maximum output power, yielding better performance at cell edges and under more challenging network conditions. The LTE-M and NB-IoT module supports a comprehensive set of 3GPP Rel. 14 features that are relevant for IoT applications, like improvements to power consumption, coverage, data rate, mobility, and positioning. It is 5G-ready, meaning customers will be able to upgrade software on their deployed devices once 5G LTE has been rolled out by mobile operators, which greatly improves product scalability and lifetime.

ALEX-R510M8S

Grade	
Automotive	
Professional	•
Standard	
Regions	
	Multi-region
Access technology	
LTE bands	1, 2, 3, 4, 5, 8, 12, 13, 18, 19, 20, 25, 26, 28, 66, 71, 85
Data rate	M1/NB2
LTE Power class	23 dBm
Positioning	
Integrated GNSS receiver	•
Dedicated GNSS antenna interface	•
Compatible with u-blox Services	
MQTT Anywhere, MQTT Flex	•
AssistNow™	•
CellLocate®	•
CloudLocate	•
IoT Security-as-a-Service	•
Interfaces	
UART	2
USB (for diagnostics)	1
DDC (I2C)	1
USIM	1
GPIO	11
Features	
Root of trust: secure element	•
Secure boot, updates, and production	•
MQTT, MQTT-SN	•
Antenna dynamic tuning	•
Ultra low PSM	•
TCP/UDP	•
HTTP, FTP	•
TLS/DTLS	•

Jamming detection	•
Antenna and SIM detection	•

M1 = LTE Cat M1 (375 kb/s DL, 1200 kb/s UL)
NB2 = Cat NB2 (125 kb/s DL, 140 kb/s UL)

□ = Available in future FW version

Features

LTE	<p>3GPP Release 13 LTE Cat M1 and NB1</p> <p>3GPP Release 14 LTE Cat M1: Coverage enhancement mode B, Uplink TBS of 2984b, Clot optimizations, and Release Assistance Indication (RAI)</p> <p>3GPP Release 14 LTE Cat NB2: Higher data rate (TBS of 2536b), mobility enhancement (RRC connection re-establishment), E-Cell ID, lower power class PC6 (14 dBm), two HARQ processes, release assistant, random access on non-anchor carrier, and Clot optimizations</p> <p>Cat M1 Half-duplex, 375 kb/s DL, 1200 kb/s UL</p> <p>Cat NB2 Half-duplex, 125 kb/s DL, 140 kb/s UL</p>
SMS	MT/MO PDU / text mode SMS over SG/NAS

Compatible with u-blox services

Communication	MQTT Anywhere MQTT Flex
Location	AssistNow CellLocate CloudLocate
Security	Design Security: Local data protection, Local chip-to-chip (C2C) security End-to-End Security: symmetric key management system (KMS), data protection, data integrity Certificate Lifecycle Control: Zero Touch Provisioning, IoT Certificate Manager

Software features

Protocols	Dual stack IPv4 and IPv6 PPP over IPv4 and IPv6 Embedded TCP/IP, UDP/IP, FTP, HTTP, DNS Embedded MQTT and MQTT-SN Embedded CoAP and Lwm2m Embedded TLS/DTLS SIM provisioning (BIP)
Positioning	Integrated u-blox M8 chipset with concurrent GNSS (GPS, GLONASS, BeiDou, Galileo) Dedicated GNSS antenna interface
Functionalities	Antenna dynamic tuning Last gasp Jamming detection Antenna and SIM detection
Firmware upgrade	Via UART uFOTA client/server solution (firmware upgrade over the air)

Further information

For contact information, see www.u-blox.com/contact-u-blox.

For more product details and ordering information, see the [product data sheet](#).

Package

133-pin LGA: 14.0 x 14.0 x 1.5 mm

Environmental data, quality, and reliability

Operating temperature	-40 °C to +85 °C
RoHS compliant (lead-free)	
Qualification according to AEC-Q104	
Manufactured in ISO/TS 16949 certified production sites	

Certifications and approvals

ALEX-R5 series	FCC, ISED, GCF, PTCRB, Verizon, AT&T, T-Mobile, US Cell ¹ , Telus ¹ , Rogers ¹ , RED, Vodafone ¹ , Deutsche Telekom ¹ , KCC ¹ , Giteki, RCM ¹ , Telstra ¹ , NCC
----------------	---

1 = Planned certifications

Electrical data

Power supply	3.8 V nominal, range 3.0 V to 4.5 V
PSM current consumption	0.5 µA
eDRX current consumption	180 µA
LTE Cat M1 Connected mode current consumption	195 mA (at 23 dBm)
LTE Cat NB2 Connected mode current consumption	135 mA (at 23 dBm)

Interfaces

Serial	8-wire UART, configurable as 2x 4-wire UART with ring indication DDC (I2C) USB for diagnostics
GPIO	Up to 11 GPIOs, configurable
(U)SIM	Supports 1.8 V and 3.0 V

Support products

EVK-ALEXR510M8S Evaluation kit for ALEX-R510M8S

Product variants

ALEX-R510M8S	Secure Cloud LTE-M and NB-IoT SiP with integrated u-blox M8 GNSS receiver for multi-regional use
