Product summary

**ZED-F9P series**

**u-blox F9 high precision GNSS modules**

**Multi-band receiver delivers centimeter-level accuracy in seconds**

- Concurrent reception of GPS, GLONASS, Galileo and BeiDou
- Multi-band RTK with fast convergence times and reliable performance
- Centimeter-level accuracy in a small and energy-efficient module
- Easy integration of RTK for fast time-to-market
- Native support for PointPerfect simplifies integration

---

**Product description**

The ZED-F9P positioning module integrates multi-band GNSS and real time kinematics (RTK) technology in a compact form factor, to deliver centimeter-level accuracies in seconds for the industrial navigation and robotics markets. ZED-F9P concurrently uses GNSS signals from the GNSS constellations GPS, GLONASS, Galileo, BeiDou, and NavIC. GNSS signals from multiple frequency bands combined with RTK technology enables fast convergence times and reliable performance for scalable applications, including robotic lawn mowers, unmanned autonomous vehicles (UAV), and semi-automated or fully automated machinery. With its high update rate and low power consumption levels, the ZED-F9P module is ideal for highly dynamic applications such as UAVs. ZED-F9P ensures the security of positioning and navigation information by using secure interfaces and advanced jamming and spoofing detection technologies. The receiver enables easy integration and helps product developers quickly bring their ideas to the market.

ZED-F9P offers support for a range of correction services allowing each application to optimize performance according to the application’s unique set of needs. ZED-F9P comes with built-in support for standard RTCM corrections, supporting centimeter-level navigation from local base stations or from virtual reference stations (VRS) in a Network RTK setup. The module supports SPARTN format SSR-type correction services suitable for mass market applications.

u-blox modules are manufactured in ISO/TS 16949 certified sites and are fully tested on a system level. Qualification tests are performed as stipulated in the ISO16750 standard: “Road vehicles – Environmental conditions and testing for electrical and electronic equipment”.

---

**Grade**

- Automotive
- Professional
- Standard

**GNSS**

- GPS + QZSS / SBAS
- GLONASS
- Galileo
- BeiDou
- Number of concurrent GNSS
  - 4

**Multi-band**

- L1/L2
- L1/L5

**Compatible u-blox services**

- AssistNow™
- PointPerfect

**Interfaces**

- UART
- USB
- SPI
- DDC (i2C compliant)

**Features**

- Programmable (flash)
- Data logging
- Carrier phase output
- Additional SAW
- RTC crystal
- Oscillator
- RTK rover
- RTK base station
- Moving base
- Survey-in and fixed mode
- Timepulse

**Power supply**

- 2.7 V – 3.6 V

---

**ZED-F9P-0xB**

**ZED-F9P-1xB**

17.0 × 22.0 × 2.4 mm

## Package

- 54-pin LGA (land grid array), 17 x 22 x 2.4 mm
- Operating temp.: -40 °C to +85 °C
- Storage temp.: -40 °C to +85 °C
- Vibration: MIL-STD-810G (Category 24, 7.7g RMS)
- RoHS compliant (2015/863/EU)
- Qualification according to ISO 16750
- Manufactured and fully tested in ISO/TS 16949 certified production sites

## Electrical data

- Supply voltage: 2.7 V to 3.6 V
- Power consumption: 68 mA at 3.0 V (continuous)
- Backup supply: 1.65 V to 3.6 V

## Compatible u-blox products and services

- Products: NEO-D9S correction receiver, NEO-D9C correction receiver
- Location services: AssistNow A-GNSS service, PointPerfect GNSS augmentation service

## Support products

- u-blox support products provide reference design, and allow efficient integration and evaluation of u-blox positioning technology.
- EVK-F9P-01: u-blox ZED-F9P-0xB evaluation kit with ANN-MB multi-band antenna
- EVK-F9P-16: u-blox ZED-F9P-1xB evaluation kit with ANN-MB1 multi-band antenna

## Product variants

- ZED-F9P-02B: u-blox high precision GNSS module with SBAS
- ZED-F9P-04B: u-blox high precision GNSS module with SPARTN and GLAS
- ZED-F9P-15B: u-blox high precision GNSS module with L1/L5
